

Binary Group Garner Multiple Industry Rankings for Solid Growth *Inc 500, Washington Technology, and Washington Business Journal Recognize Binary*

Bethesda, MD., October 9, 2007 – Binary Group, a high achieving management and technology-consulting firm, announced today that it has been named to this year's Washington Technology Fast 50 list of federal contractors for the third consecutive year in a row and was also named by Washington Business Journal as one of the fastest growing companies in the Greater Washington area. These listings follow the company's repeat listing on Inc. Magazine's Inc. 500 list as part of the fastest growing privately held companies nationwide.

Each award's ranking is based on Binary's compound annual growth rates, which are backed by Ms Rose Wang, Binary's CEO, and her management team's ability to transform and poise Binary to fulfill a critical government need to provide policy, strategy, architecture, governance, and procurement & program oversight while migrating away from building or integrating software systems. The removal of the system integration component abated potential conflict of interest (COI) situations and better positioned Binary for entry within the government. Narrowing the field of service offerings to SAGE (Strategy Architecture Governance Engineering) has led to corporate fortitude and extraordinary growth for Binary, especially at the Chief Information Officer (CIO) level.

"I am appreciative of the continued recognition by such revered media outlets. This recognition is attributed to all the Binarians who make up our hard working, multi-disciplinary teams who are committed to our customers. Binary's reputation of possessing the ability to connect the dots as advisors, thinkers and doers has enabled us to rapidly respond to the critical needs of the government and grow as a corporation. We are singularly focused on delighting our customers," stated Ms. Wang.

Binary has grown at a 100+ percent average rate in revenue since 2004 and government contracts now represent 100% of Binary's business. Binary is supporting the US Army, Office of Secretary of Defense, Army Corps of Engineers, US Air Force, US Navy, and Defense Information Systems Agency through their SAGE model — Strategy, Architecture, Governance, and Engineering with the innate ability to move customers along the IT business transformation path.
