

## **Binary Group Hits Ground Running with Army Program Management Support Services Contract**

*Small company wins big with the PEO EIS PMSS2 contract award*

**Arlington, VA**, August 4, 2009 — The Army's Program Executive Office for Enterprise Information Systems (PEO EIS) awarded Binary Group the Program Management Support Services 2 (PMSS2) contract vehicle. Binary is among five contract awardees and is one of only two small business reserve awardees. The contract vehicle provides a venue to compete for task orders among the winning teams. The ceiling value for the PMSS2 contract is approximately \$478.6 million over five years.

The PMSS2 contract provides the Office of the Army Chief Information Officer/G-6 (CIO/G-6), the PEO EIS headquarters, directorates, and program, project, and product offices the full range of IT-related program management support services, including advisory and consulting services. These services will support various missions of command, control, and communications activities and the Army's transformation to state-of-the-art technology with a new modular "Future Force."

Lisa Hugo, Binary Group's PMSS2 Program Manager, is aggressively engaging her team and pursuing task order leads. Steve Siegmund, a veteran within the CIO/G6 community as a policy subject matter expert, is second in charge for Binary's PMSS2 program.

As prime contractor, Binary Group leads a consortium of the industry's best small and large businesses with core customer experience and specialized IT program management capabilities with the ability to deliver additional PEO EIS continuity, capacity, reach-back capability, and worldwide presence. Team Binary has proven experience and leadership in providing innovative technologies and solutions for mission-critical national security programs supporting the Department of Defense and other federal agencies.

Binary Group is no newcomer to the Army — experience ranges from the Army program management support and advisory service contracts for the CIO/G-6 to the General Fund Enterprise Business System (GFEB) program. "Although Binary is the smallest company of the five awardees, I believe we have the best advantage because we know the culture and inner-workings of PEO EIS and CIO/G-6. We have built a creditable team and are ready to deliver," said CEO Rose Wang.

Team Binary will have a prevailing presence at the LandWarNet Conference in Fort Lauderdale, FL August 16-20.

### **About Binary Group, Inc.**

Headquartered in Arlington, Va., Binary Group, Inc. serves mission-driven leaders with enterprise-level responsibility in information technology by providing best value, strategic IT program support services that are free of organizational conflict of interest (OCI). Binary delivers strategy, architecture, governance, engineering design, and related management and planning to federal government customers including U.S. Army, U.S. Navy, U.S. Air Force, Office of Secretary of Defense, Army Corps of Engineers, and Defense Information Systems Agency (DISA).
