

Binary Group CEO Guest Speaker at US Women Chamber of Commerce Conference

Ms. Wang Shares experiences about partnering and business growth at Women-Owned Small Business Conference Co-sponsored by US Army.

Bethesda, MD., April 30, 2007 – Binary Group’s CEO, Rose Wang, was guest speaker at the US Army Day: Women-Owned Small Business Conference held in Washington, DC, by the US Women Chamber of Commerce. The conference hosted over 300 women-owned small businesses and was themed “*Generations of Women Moving Forward through Small Business.*”

During the *Business Development through Joint Ventures and Teaming Panel*, Ms. Wang spoke candidly about her experience and the challenges she has overcome to increase Binary’s business capability and contract growth within the Army and the federal government market through successful partnering with large and small companies. “Events like this are excellent forums to learn, educate and share information – helping fellow women business owners benefit from the trials and tribulations I’ve experienced as Binary works hard to increase our market share within Department of Defense – partnering as both a prime and subcontractor has been paramount in our success.” stated Ms. Wang.

According to Ms. Tracey Pinson, Director, Office of Small Business Programs for the Army, Ms. Wang contributed immeasurably to the success of the conference and that partnerships and collaborative efforts are critical components in maximizing opportunities for women-owned businesses.

Supporting the Army and guiding its business transformation has been at the forefront of Binary’s business since 2002. Recognized by Inc. 500 and Washington Technology’s Fast 50, Binary Group has become the “go to” company for SAGE capabilities in IT, i.e. Strategy, Architecture, Governance, and Engineering services.

About Binary Group

Headquartered in Bethesda, Md., Binary Group Inc. serves mission-driven leaders with enterprise-level responsibility in information technology by providing best value, strategic IT services that are free of organizational conflict of interest (OCI). Binary delivers strategy, architecture, governance, engineering design, and related management and technology planning to government customers including U.S. Army, U.S. Navy, U.S. Air Force, Office of Secretary of Defense, Army Corps of Engineers, and Defense Information Systems Agency (DISA). Binary is a 2006 Inc. 500 recipient and two-time recipient of the *Washington Technology Fast 50* award.
