Rose Wang Honored at Eighth Annual Women in Technology Leadership Awards *Binary Group CEO Wins Entrepreneur Award*

Bethesda, MD – May 30, 2007 – Rose Wang, President & CEO, Binary Group, Inc. was recognized as a winner by Women in Technology (WIT), the premier organization dedicated to contributing to the success of professional women in the Washington technology community, at its Eighth Annual Women in Technology Leadership Awards. Ms. Wang was honored in the Entrepreneur category at the May 17, 2007, awards presentation and gala. The awards recognize women who embody WIT's spirit to Connect, Lead, Succeed and who have excelled in their roles as mentors, leaders and role models.

*Binary Group, President & CEO, Rose Wang
Accepts WIT Entrepreneur Award*

According to Ms. Wang, “To be among a record number of nominees of outstanding, notable women leaders, I am extremely honored and pleased to be the recipient of the WIT Entrepreneur award. This is a great honor for Binary and me, because of what WIT stands for. I am proud to be a Binarian!”

It is not by accident Ms. Wang has built Binary upon some of the same core values and tenants as WIT's values to Connect, Lead, Succeed. She makes it a personal and business mission to ensure Binary is a values-based company where Binary's corporate culture focuses on two core principles 1) Impact and 2) Belonging. In making an impact Ms. Wang empowers her team to make a difference. “Belonging”, the second principle, is directly correlated to “Connecting” – both principles make a difference with Binary's customers and the community.

Ms. Wang has formed an award-winning company with record growth, an impressive corporate culture, all driven by her stellar team. Early in the history of Binary Group, Ms. Wang focused the company's expertise on the business transformation needs of their customers, providing objective strategic advisory services, which is making Binary the “go to” company for Federal agencies. Binary connects the dots for customers through their SAGE model — Strategy, Architecture, Governance, Engineering – acting as strategic advisors, thinkers and doers with the innate ability to move customers along the IT business transformation path getting them from Point A to Point B.

“The caliber of the nominations that WIT received this year for its Leadership Awards was outstanding,” said Marguerete Luter, president of WIT. “We are thrilled to recognize Rose for her stellar contributions to the technology community at large and to Binary specifically.”

Ms. Wang shares this award with her team and Binary's customers: “I would like to thank our customers, and those small business advocates in the government who have really made a difference. Without their trust in us, Binary would not be where we are today as a rapidly growing small business. I dedicate this award to Binarians and the leadership team of Binary. They are the ones who make it happen!” This has been a winning season for Ms. Wang and Binary with inclusion in Inc500 and Washington Technology Fast50, which preceded the recent WIT award.

About Binary Group, Inc.

Headquartered in Bethesda, Md., Binary Group Inc. serves mission-driven leaders with enterprise-level responsibility in information technology by providing best value, strategic IT program support services that are free of organizational conflict of interest (OCI). Binary delivers strategy, architecture, governance, engineering design, and related management and planning to federal government customers including U.S. Army, U.S. Navy, U.S. Air Force, Office of Secretary of Defense, Army Corps of Engineers, and Defense Information Systems Agency (DISA). Binary is a 2006 Inc. 500 recipient and two-time recipient of the *Washington Technology* Fast 50 award.

About Women in Technology

Women in Technology (WIT) is a not-for-profit organization dedicated to offering women involved in all levels of the technology industry a wide range of professional development and networking opportunities. One of the organization's main goals is to create a forum where women in technology can be recognized and promoted as role models. The organization's values are embodied in its tag line: *Connect. Lead. Succeed.* WIT was founded in 1994 and has nearly 1,000 members. For more information, please visit WIT's web site, www.womenintechnology.org.
